Why dental care is important to your overall health...

Consider this: people who suffer from periodontal disease are twice as likely to have heart disease or a stroke.¹ And there's also research linking poor oral health to diabetes, lung disease and premature births.²

Fortunately, regular dental checkups can help detect the early warning signs of certain health-related issues. That's just one reason why it's so important to take good care of your teeth and gums. And the Dental Blue plans from Anthem Blue Cross Life and Health Insurance Company can help make it easy and affordable.

How the Dental Blue plans work:

We offer two great Dental Blue plans to choose from: Dental Blue Basic and Dental Blue Enhanced. The Dental Blue Basic plan provides coverage for many diagnostic services and preventive care such as cleanings, exams and X-rays, as well as fillings, with an annual maximum of \$500. The Dental Blue Enhanced plan includes cleanings, exams, X-rays and fillings — plus certain major services like root canals, periodontal procedures and crowns, with an annual maximum of \$1,250. It also includes orthodontic coverage for children after a 12-month waiting period.

A unique feature of Dental Blue is that members have access to the rates Anthem has negotiated with providers for covered services received during any applicable waiting periods and after the annual maximum has been met. These negotiated rates are available only at in-network providers.

Choice of dentists

Your dental plan lets you choose any dentist whether or not that dentist is part of our Dental Blue 100 network. The Dental Blue 100 network currently has more than 19,000 providers and provider locations - so it's likely your dentist participates in our program.

You might pay more when you visit an out-of-network dentist

While your dental plan lets you choose any dentist, you may end up paying more for a service if you visit an out-of-network dentist.

Here's why: **In-network dentists** have agreed to payment rates for various services and cannot charge you more. On the other hand, **out-of-network dentists** don't have a contract with us and are able to bill you for the difference between the total amount we allow to be paid for a service - called the "maximum allowed amount" - and the amount they usually charge for a service. When they bill you for this difference, it's called "balance billing."

How we decide on maximum allowed amounts

The amounts we pay for dental services are based on a "fee schedule" (for example, the fee schedule may show that we will allow no more than \$50 per filling or \$25 for an office visit). The fee that Anthem pays for each out-of-network service is called the "maximum allowed amount" for that service. The maximum allowed amount is determined in one of the following ways:

- ▶▶ Out-of-network dental fee schedule/rates developed by Anthem*
- ▶▶ Information provided by a third-party vendor that gathers similar costs for dental services
- ▶▶ In-network dentist fee schedule

* These schedules may be updated based on things like reimbursement amounts accepted by dentists contracted with our dental plans or other industry cost, reimbursement and utilization data.

Here's an example of higher costs for out-of-network dental services

This is an example only. Your experience may be different, depending on your insurance plan, the services you receive and who provides the services.

Ted gets a crown from an out-of-network dentist who charges \$1,200 for the service and bills Anthem for that amount.

Anthem's maximum allowed amount for this dental service is \$800. That means there will be a \$400 difference, which the dentist can balance bill Ted.

Since Ted will also need to pay \$400 coinsurance, the total he'll pay the out-of-network dentist is \$800.

Here's the math:

- › Dentist's charge: **\$1,200**
- › Anthem's maximum allowed amount: **\$800**
- › Anthem pays 50%: **\$400**
- › You pay 50% (coinsurance): **\$400**
- › Balance you owe the provider: $\$1,200 - \$800 = \$400$
- › Your total cost: $\$400$ coinsurance
+ $\$400$ provider balance = **\$800**

In the example, if Ted had gone to an in-network dentist, his cost would be only \$400 for the coinsurance because he would not have been balance billed the \$400 difference.
